Inset Central Heating Collection

# Inset Central Heating

## SHOULDN'T YOUR BOILER WORK HARDER?

**If your heating system is archaic, unattractive, or getting in the way of everyday life, then Inset Central Heating is the solution.**

**Instead of a space-consuming boiler, a handsome inset fire drives your central heating.**

**Give it pride of place in your living space and enjoy the benefits throughout your home.**

Our fires are renowned for their stylish design, forward-thinking technologies and great workmanship. And you can be sure they reach the highest standards – because every one is benchmarked by HETAS, guaranteeing high performance and efficiency.

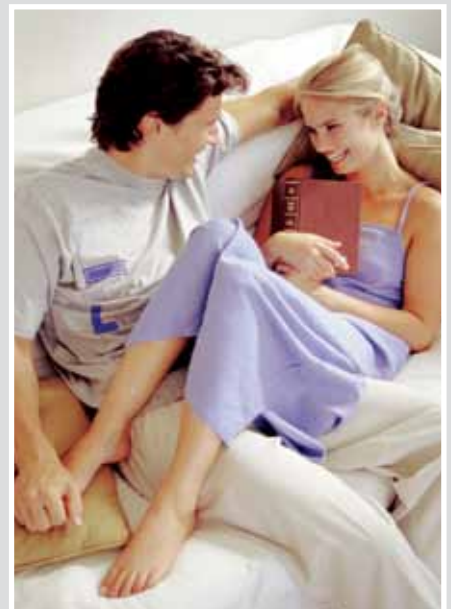

Take a look through our new brochure and find a fire to suit your taste. Our range contains inset systems to suit minimalist or traditional décor. Whether you're looking for a contemporary inset fire for a small space, or a family-sized fire to heat water and home, you'll find it at Parkray.

## G Range

**Central heating never used to be this sexy. The chic, designer look of our G Range fire makes it a statement in its own right – and that's before it gets down to work.** With a heat output ranging between 9.4 and 11.7kW, the G Range inset fire will warm your toes in minutes. It operates on smokeless fuel, which cuts back on environmental impact. And this modern appliance has less impact on your budget, too – it's reliable, powerful, and economical, heating between 8 (99G) and 10 radiators (111G) with an average efficiency of around 71%.

Hot water? The G Range takes care of it; and a waterway thermostat allows you to adapt the temperature to your liking. Let's talk colours: the contemporary-look G Range fire is available in a matt black (pictured) or Autumn Dusk enamel finish (perfect for neutral colour schemes). Now the only thing left to choose is a stylish fireside armchair...

## Paragon

Elegantly designed and carefully built, the Paragon is the perfect choice for your living room. This inset fire has been designed with simple lines and a minimalist look, framed in matt black cast iron. Burn coal, wood, or smokeless fuel, and then use the overnight plate to let the embers smoulder while you slumber.

## Cumbria

Bask beside an old-fashioned log fire, while it silently warms the water for your bath. The Cumbria has all of last century's charm, but it's actually a well-designed modern heating system. While you enjoy the gentle flicker of real flames, a hidden back-boiler supplies hot water for your entire home. You can burn smokeless fuel or other recommended fuels, and the Cumbria never fails to deliver excellent performance. With an efficiency rating of between 67 and 69%, and a waterway thermostat allowing you to maintain a comfortable temperature, it's comparable to a modern boiler system – and it looks far better. The Cumbria comes in two models, and your choice depends on how much warmth you need. The 99 model can heat your water plus 8–9 radiators, and the Cumbria 111 model can heat your water and up to 10 radiators. Country living has arrived in the twenty-first century...

Having chosen your heating appliance, don't leave the installation to an amateur. Before placing any order, make an appointment with a HETAS-qualified installer, or similarly competent professional, to discuss suitability and ensure that the installation will comply with Building Regulations. Parkray cannot be held responsible for any losses, however arising, incurred during inappropriate installations or by unqualified or incompetent installers. An inappropriate installation may also invalidate claims made under the Parkray warranty or guarantee.
